

Fourth International Conference
Mathematics in Finance
Kruger National Park, South Africa
21 – 26 August, 2011

Call for Abstracts

Dear Colleagues,

The Fourth International Conference on Mathematics in Finance (MiF 2011) will be held in the Kruger National Park, South Africa, from the 21st to the 26th of August, 2011. The conference is jointly organised by the Programme in Advanced Mathematics of Finance at the University of the Witwatersrand, the Centre for Business Mathematics & Informatics at North-West University and the Department of Mathematics & Applied Mathematics at the University of Pretoria, and is a triennial event.

This is the official call for abstracts for MiF 2011. Submissions are invited on substantial, original and previously unpublished research in all fields of Mathematical and Statistical Finance.

The conference language is English. If you wish to present a paper at the conference, please submit an abstract by email to conference.mif@up.ac.za. Abstracts should be prepared according to a \LaTeX template which is available at <http://www.mif2011.up.ac.za>.

The closing date for the receipt of papers/abstracts is the 31st March, 2011. The review process and acceptance of papers will be completed and communicated to the author(s) by the 31st of May, 2011. Accepted abstracts will be made available on the conference website to a wider audience.

The abstract submission should constitute a formal commitment by the author(s) to present the corresponding research in the session and time-slot assigned by the Scientific Committee. Changes in authorship should be communicated to the Scientific Committee in order to ensure correct appearance in the printed program.

We would appreciate your efforts in informing colleagues, students and friends who may have an interest in the conference, and who may be interested in contributing or attending.

I look forward to meeting you all in the Kruger National Park, South Africa in August, 2011.

Sincerely,

Professor Johan Swart

Chairman, Organising Committee MiF 2011

Department of Mathematics & Applied Mathematics

University of Pretoria
